(5) B. J. Hospital for Children	..	100

(7) Cama and Albless Hospitals	..	155
		1,218

Hundred beds at each of the J. J. and St. George's Hospitals have been placed at the disposal of the Defence Department and are in active use.

6. *St. George's Hospital, Bombay.*—Since the installation of the new Diagnostic X-Ray apparatus, the working in the X-Ray Department is very satisfactory.

7. *G. T. Hospital, Bombay.*—The outstanding event so far as the medical administration of this Hospital is concerned, is the introduction of the Unit System (three Medical and two Surgical). Each Unit consists of a head, an assistant and a houseman. The following posts have been created since the formation of the Units, i.e., 17th January 1942 :—

3 Honorary Assistant Physicians.

2 Honorary Assistant Surgeons.

1 Medical Registrar and Tutor.

1 Surgical Registrar and Tutor.

This resulted in abolishing the following posts :—

1 Honorary Physician.

1 Honorary Surgeon.

1 Casualty Medical Officer.

1 House Surgeon.

1 Honorary Assistant Physician, Out-patients' Department.

1 Honorary Assistant Surgeon, Out-patients' Department.

Superficial Therapy X-Ray Unit from St. George's Hospital was installed during the year under report and the addition of an inductotherm was made to the Electro-Therapeutic Department.

Government have sanctioned the proposal to replace the existing course in X-Rays at the G. T. Hospital by a systematic course on the lines of the Syllabus in force at the Bernard Institute of Radiology, Madras, and to give a diploma to the trainees at the end of the course of nine months. They have for this purpose sanctioned the purchase of a new X-Ray Diagnostic Unit (at a cost of Rs. 31,000) which has been installed.

8. *Cama and Albless Hospitals, Bombay.*—The new Jaffer Suleman Dispensary (Out-patients' Department) building was completed during the year at a cost of about Rs. 2,05,000 and the opening ceremony was performed by His Excellency the Governor of Bombay on 27th November 1941. Since the Jaffer Suleman Dispensary has started functioning in the new building with effect from 1st December 1941, each Department has been provided with a special room, with the result that the work is now much facilitated and there is no congestion.

An X-Ray Diagnostic set has been fitted in the new Jaffer Suleman Dispensary. In future all X-Ray work except deep therapy, will be done at these hospitals.

9. (*a*) *J. J. Group of Hospitals, Bombay.*—Amongst the changes in the J.J. Group of Hospitals the addition of the Tuberculosis ward under a special Honorary Medical Officer is noteworthy. A separate ward of 20 beds is provided and teaching in the subject is now specialised.

The Clinical Unit System introduced at these hospitals has worked very satisfactorily. The great advantage of the Unit system has been that certain units have been able to concentrate on certain types of work. Thus blood diseases, basal metabolic estimations, electro-cardiography and blood transfusions are now being done by the Honorary Assistant Physicians attached to some of the units.

A considerable amount of research work of the clinical type mainly, has been done during the past three years, much more than was possible before the Units were established.

(*b*) *Bai Motlibai and Petit Hospitals, Bombay.*—Since the extension of the Bai Motlibai Hospital is provided with a Clinical Lecture Theatre, Museum and a Clinical Laboratory, the teaching work has been facilitated.

The presence of Dwarkadas Lallubhai female Out-patients' Department so near the main hospital has improved the teaching in Gynaecological, Ante-natal and Post-natal Clinics in co-operation with the In-patients' Department.

(c) *Sir C. J. Ophthalmic Hospital, Bombay.*—As a result of the extension of the hospital from 73 beds to 100 beds one ward of 7 beds for Parsee males and Parsee females is reserved during the year.

Since the diploma of D.O.M.S. is getting more popular a large number of Post-graduates are attracted to this hospital. During the year 31 Post-graduates attended the hospital.

MOFUSSIL HOSPITALS.

10. *Civil Hospital, Ahmedabad.*—The scheme of building a new hospital on a more open and healthy site outside the City walls, has been postponed till after the war. The land is, however, being acquired.

11. *Civil Hospital, Dharwar.*—The old X-Ray machine was replaced by a new one costing about Rs. 9,000.

12. *Civil Hospital, Satara.*—This hospital has been provided with an X-Ray apparatus and it is hoped that it will be fully utilised.

13. *Sassoon Hospitals, Poona.*—An Advisory Committee for the recruitment of probationer nurses was formed during the year 1941 and is doing useful work.

14. *Civil Hospital, Kaira.*—A new maternity ward has been constructed and the ward is already taken into use.

15. *Civil Hospital, Nasik.*—Government have accorded administrative approval to the scheme of providing an Out-patients' Department at the hospital. The increase in the number of beds from 82 to 100 has been administratively approved by Government. The X-Ray apparatus at that hospital has been installed and the Department is functioning satisfactorily.

26. *Cottage Hospitals.*—A scheme to convert some of the existing dispensaries in the mofussil into "Cottage Hospitals" with B.M.S. Class II Officers in charge, is under consideration. These hospitals are expected to provide a co-ordinating link between Medical Practitioners at one end of the chain of Medical Relief and the District Headquarters Hospital with its facilities for modern treatment at the other. The Commissioners of Divisions have been asked to consult the local bodies whether they are prepared to co-operate in the scheme and to bear the extra recurring expenditure involved.

5. With the opening of the Mechanical Department from June 1941 and with the admission of five students of whom only one is a senior (M.B.B.S.) student, the Sir Currimbhoy Ebrahim Dental School and Hospital, Bombay, started functioning as a full fledged dental hospital.

Besides the regular dental school students, 4th year medical students of the Grant Medical College were also given instructions in practical dental surgery.

Haffkine Institute, Bombay.

During the year 1941 the Institute continued to function as—

(*a*) a centre for manufacture of plague vaccine for the whole of India and other vaccines for the Bombay Province ;

(*b*) the provincial laboratory for the Bombay Province ;

(*c*) the centre for the manufacture of anti-rabic vaccine for the Bombay Province and the adjoining areas and the treatment centre for the Bombay City, and in addition, carried out research work on plague and other subjects largely with the help of Indian Research Fund Association.

2. (*a*) *Vaccine Department.*—Vaccine issued during the year :—

Vaccines.	Quantity.
Plague Vaccine	40,89,888 c.cs.
Cholera Vaccine	27,84,772 c.cs.
T. A. B. Vaccine	67,090 c.cs.

(*b*) *Serum Department.*—More than 50,000 doses of various sera were prepared at the Institute and supplied to different hospitals, A. R. P. organisations and the Army in India, to the Colonial Government of Seychelles, Mahe, to the Government of Iraq and to the Consulate General of the Republic of Poland in Bombay. A large stock of sera was kept ready for use of the hospitals in this province in case of an emergency.

3. *Anti-rabic Department.*—During the year one new centre was opened, thus bringing the total number of centres operating in the Province to 103. During the year 7,984 anti-rabic treatments were issued to the centres. This figure includes 597 treatments issued for the veterinary use.

4. *Diagnostic Department.*—During the year 10,571 specimens were examined by this department for various Government hospitals and dispensaries. The number of Wassermann and Kahn tests carried out was, 3,796 and 3,724 respectively. With the beginning of the year the department, in addition to the routine work continued the typhoid inquiry for a month or so but later the services of the S.M.S. Officer for the collection of, blood were discontinued. The institute, however, continued to give free diagnostic aid to private medical practitioners who collected the samples themselves and arranged to send them to the Institute for diagnosis. 375 specimens were received during the year out of which 56 samples were collected by the S. M. S. Officer and 319 specimens were received from the private practitioners.

5. *Biochemical Unit.*—This department continued to give diagnostic aid to various hospitals and medical practitioners as usual. Research on the chemical composition of urines of normal Indians and investigations to improve plague vaccine were underaken. Also the experimental work was carried on to establish a dosage response for the unknown and the standard for use in the assay in Vitamin D.

6. *Department of Entomology.*—This department attended to several requirements made for the identification of insects and snakes. An inquiry into the recrudescence of plague in Sholapur and Dharwar Districts was conducted by this department during the year. A number of medical men and sanitary inspectors were trained in rat examination and rat and flea destruction.

Researches.

7. (*a*) *Plague Researches.*—(1) Plague Vaccine : Studies on the effect of different plague strains in the preparation of plague vaccine in various specialised media were undertaken. It is hoped that a better, more potent and less toxic plague vaccine will soon result.

(2) *Chemotherapy in Plague Infection.*—Studies on the therapeutic properties of many derivatives of Sulphanilamide have been undertaken and some compounds have been discovered which possess good therapeutic effects.

(3) *Anti-plague Serum and Sulphathiazole.*—Work of preparing anti-plague serum on an experimental scale was continued. About the and of last year an epidemic was reported from Latur in H. E. H. The Nizam's Dominions and a unit was sent for trial. During these trials a newly discovered drug, viz., Sulphathizaole was used side by side with anti-plague serum. Results obtained show that Sulphathiazole possesses a high curative value both in bubonic cases and in septicæmic cases.

(4) *Serology of Plague Bacillus.*—Studies on the serological differentiation of the representative strains of *Past Pestis* were continued by various specific methods. More detailed studies of the protective specific soluble substance of the plague bacillus were undertaken on quantitative basis. There is a possibility that one of these methods might be utilised to replace or minimise the use of experimental animals (mice) in evaluating the potency of plague vaccine and anti-plague serum.

(*b*) *Pharmacology.*—The work in the Pharmacological department was chiefly concerned with research work on anti-malaria drugs. At the same time the problem of malaria immunity in the rhesus monkey was investigated and sufficient evidence collected to show that both "humoral and cellular" factors are involved in giving immunity against malaria. The department also investigated the pharmacological and therapeutic properties of some new sulphonamide derivatives prepared by the chemotherapy department.

The department was actively engaged in testing the suitability of ordinary bottles for storing solutions for intravenous use such as glucose solutions and has arrived at the conclusion that white gin bottles can be conveniently used for the purpose. The department has also investigated the question of preservation of some important drugs such as morphine solutions.

The department has also been assaying B. P. drugs.

MO-I Bk O 22—4

(c) *Leptospirosis.*—The inquiry was commenced in the beginning of the year with a view to detecting the leptospiral nature of the disease and to carry out a complete study in regard to its incidence, epidemiology and other standpoints. Leptospiral infection in rat—(i) This investigation has a bearing upon the epidemiology of the disease and was undertaken with a view to demonstrating the infection and identifying the organism with special reference to its serological classification, Human cases of the disease. It was decided to tackle all cases of the acute jaundice with fever and this seemed to be the best line of approach for the detection of the disease. The presence of the disease now has been definitely recognised and the diagnosis was supported by bacteriological studies without which it cannot be accepted as reliable.

8. The following table shows the receipts and expenditure of the Institute for the year 1941 :—

9. The year under review saw a considerable extension of the spheres of usefulness of the institute to the country. Particularly noteworthy in this respect has been the operation of the Department of Serum Manufacture opened towards the end of 1939. In the nature of things production was organised on a small scale. But the opening of th department coincided with the scarcity of supplies from abroad. Th demand thus proved to be several times the production capacity o the department. Over a lakh worth of sera were produced and issue during the year, and during the last few months large orders for ser are pouring in—orders already amount to about rupees 4 lakhs worth o sera. This circumstance and the imperative need of the country calls fo an immediate and extensive enlargement of production. The oth important extension has been in the sphere of drug testing to implemen the Drugs Act. Work has already been started on a small scale an plans have been prepared to organise a well-planned and well-equipp department to undertake all types of work called for bio-assay an chemical examination of drug, testing of sera and measuring the vitam content of foods and vitamin products.

The Department of the Chemical Analyser to Government.

The following is a short summary of the work performed by the Chemical Analyser to Government, Bombay, during the year 1941 :—

Since 13,153 articles were examined, the cost of analysis per article comes to Rs. 3–4–9.

3. As stated last year, most of the analysis are on behalf of Government Departments of Excise, Law, Justice and Police ; it is not possible at all, therefore, for the Laboratory to be self-supporting, since the work is done free of charge, as it should be, and hence no direct income accrues to the Laboratory.

4. Such of the explosive substances as were required to be examined for the Police or for legal purposes, were tested in the laboratory as usual. These were sent either by the Police or by the Inspector of Explosives, West Circle, Bombay.

5. Interesting notes as usual about poisoning by Oxalic Acid Potassium Cyanide, Fire-work compositions, etc., and other cases are given in the detailed Annual Report of the Chemical Analyser to Government for the year, 1941.

CLASSES I AND II.—These include all institutions maintained by provincial funds and under Government management. The fact that an institution possesses endowments or receives contributions from local funds or private subscriptions has not been regarded as a reason for not classing it as "State" when provincial and imperial funds are practically responsible for all the charges connected with it. Class I—"Public" are State Dispensaries which are open to the poorer classes of the public. Class II are State Dispensaries which serve only a special section of the public as indicated in the sub-classification attached.

CLASS III.—Local fund dispensaries include all institutions which are vested in local boards or municipalities or guaranteed or maintained by local or municipal funds. The fact that such an institution is aided by private subscriptions or receives assistance from Government in the shape of part of the salary of the medical officer, grants of medicine, or otherwise, has not been regarded as a reason for not classing it as a local fund dispensary, when its existence is practically dependent upon local funds.

CLASS IV.—Comprises institutions supported by private subscriptions or guarantee, but receiving aid from Government or local funds.

CLASS V.—Comprises institutions maintained entirely at the cost of private individuals or associations. The fact that Government supplies superior inspection or registers has not been regarded as a reason for not treating it as a private non-aided dispensary.

CLASS VI.—Comprises all railway dispensaries whether maintained by State railways or others.

CLASS VII.—Comprises all subsidised dispensaries opened under the "Rural Medical Relief Scheme."

† This institution is newly added.

(*a*) There is a difference of Rs. 4,147 between the closing balance for 1940 and the opening balance for 1941. It is due to the inclusion of new institutions, namely, N. M. Wadia Mission Hospital, Poona, Byadgi Dispensary and Civil Hospital, Godhra and the exclusion of the closing balance of Rs. 20,000 for 1940 pertaining to Ranchhodlal Home Medical Relief Institution, Ahmedabad, which has been closed from 1st November 1940.
